

PRESS RELEASE FROM IGLASS

FOR IMMEDIATE RELEASE

New and exclusive to iglass – The Floating Glass Table

Designed and produced by iglass, the new and fantastically unique floating glass table will create a 'WOW' factor in any bedroom, kitchen or living room.

Its unique design gives a magical illusion and the table literally looks like it is floating in mid-air. It is a stunning design effect and is quite simply the first of its kind to hit the market place. iglass have used crystal clear glass for the base which has a highly polished finish to give the impression of clear space – it is ingenious.

The table refreshes any room with its clean modern lines and with the practical hygienic elements intrinsic to glass; the floating glass table magnificently blends functionality with imaginative style.

As well as the illusionary and practical design element, this table offers the design flexibility to change the mood of a room with a quick switch of the table top – it is reversible!

You can have one side of your glass table as, for example, a bed of roses, which have been digitally printed onto the glass; or a patterned wallpaper to match your room and on the reverse you can have a completely different image or design – the choice is yours.

The options are endless. Either choose from our standard colours and have the ability to change the mood of your room from an energetic day look to a sensual evening look or go for a totally personal and customised look and give us the imagery you want replicated on your table.

It's a ground-breaking design that offers you the ability to blend practicality with the most unique and un-constrained style.

The design possibilities are infinite.
