

**PRESS RELEASE FROM IGLASS
MAY 11th 2010**

FOR IMMEDIATE RELEASE

iglass create a sensation at Grand Designs with the stunning new, silver crackle glass table

People were stopped in their tracks at Grand Designs when they walked past the iglass stand.

iglass had chosen the show to launch their latest spectacular glass product. An 8-seater all glass dining table with a stunning mirrored, silver crackle glass effect, table top.

The table top, which is actually made up of 3 pieces of glass, with the middle sheet having the crackled effect became mesmerising to all visitors and at some stages in the show there were hoards of people gathered to catch a glimpse of the sparkly creation.

Gregg Botterman, MD of iglass commented on the unprecedented interest in the table "it was totally beyond what we expected. People loved it. I have never had so many people crowding onto an iglass stand before! We love the product and knew it would be a big hit, but we certainly didn't expect anything like this!

The H table range is available in a 10 and 8-seater dining table, a coffee table, a side table or can be made to any size and is available in any of the iglass 24 standard colours, clear glass or the extraordinary crackle glass finish which is available in silver, bronze, smokey black, light blue, light green and even gold.

The amazing crackle glass top is also available on the iglass floating glass table as well as a kitchen worktop or splashback.

Other products that grasped visitor's attention were the beautiful red rose digitally printed floating glass table – which is a reversible table top; the range of all glass door handles and the fantastic back-lit kitchen splashback.

"The back-lit splashback was exceptionally popular", said Gregg. "We secured several orders for this product then and there at the show – people simply haven't seen anything like it and they really loved the versatility of being able to change the colour of their splashback whenever they wished – it's an ideal solution when a couple can't agree of which colour splashback they want!"

iglass have a unique range of glass furniture, glass worktops and splashbacks, door handles, mirrors, shower enclosures and more. To view their full product range you can request a catalogue from their website: www.iglass.co.uk.
